

| The laneways in St. John's prove to be the most interesting pedestrian pathways through the city. Laneways provide spaces and links between places..... empowering the pedestrian. They can become venues for community or artistic endeavors, green spaces, unique destinations that have businesses operating from laneways. St. John's is host to a number of laneways, only some of which we will see on this tour. The laneways offer wonderful views through the city & all laneways originally led to the harbour. |
